

## FROM CRAWLING TO WALKING !

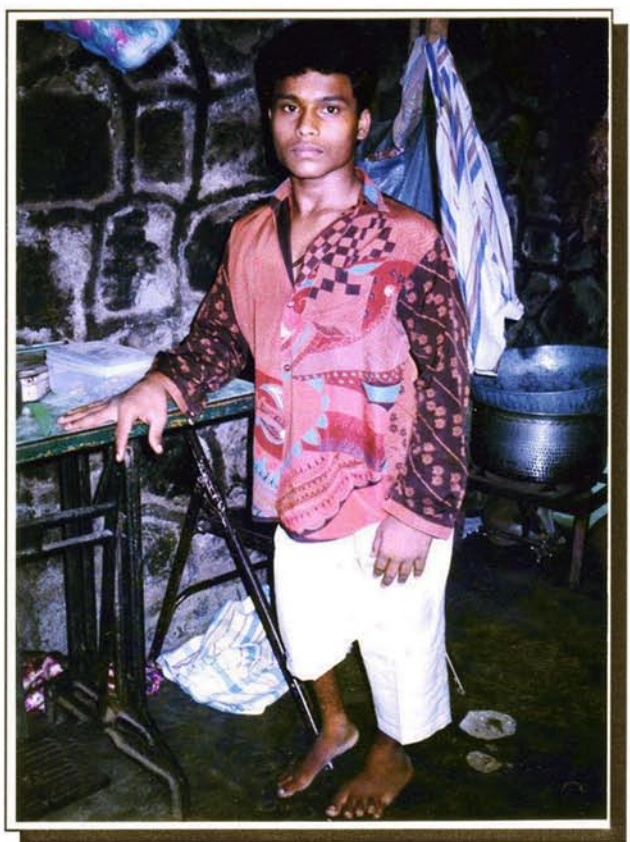

During the 3 months while his leg was in a fixator, the boy was taught to read and write Hindi !

3 months later his left leg was completely stretched out.....

Physiotherapy and proper exercises helped build up the muscles, enabling the boy to use his leg fully for the first time in his life.

Nazir doing his first walking exercises. A special shoe and caliper was given to him to eventually move around without the need of crutches.
